Description

WACHENDORFF Series-1 Panel-PC

The WACHENDORFF Series-1 industrial Panel-PCs are available in display sizes from 10" to 23.8" and can be equipped with projected capacitive, resistive or no touch. The projected capacitive touch enables multi-touch operation with an appropriate operating system. If pressure-sensitive operation is required (e.g. with gloves), the resistive touch is the right choice. You can choose from a variety of different processors, from the energy-efficient Intel® Celeron® J4125 to a 10th generation Intel® CoreTM i7. Integrate up to 64 GB of RAM to meet the most demanding requirements. The front panels are absolutely flush with the die-cast aluminum housing. The housing is IP65 rated. The unique fanless thermal design of the die-cast aluminum housing enables effective temperature control.
