Description

The WACHENDORFF Series-1 industrial panel PCs are available in display sizes ranging from 10.1" to 23.8" and can be equipped with projected capacitive, resistive or no touch. The projected capacitive touch enables multi-touch operation with an appropriate operating system. If pressure-sensitive operation is required (e.g. with gloves), the resistive touch is the right choice. A variety of different processors are available, from the energy-efficient Intel® Celeron® J4125 to a 10th generation Intel® Core™ i7. Integrate up to 64 GB of RAM to meet the most demanding requirements. The front panels are absolutely flush with the die-cast aluminium housing. The housing is IP65 rated from the front. The unique fanless thermal design of the die-cast aluminium housing enables effective temperature control.
