Description

WACHENDORFF Series-1 Box PC

These robust X86 Box PCs, equipped with Intel Core processors, have been specially developed for demanding automation applications such as edge computing. They offer a choice of 4 to 64 GB RAM and various interfaces, including 6x COM, 6x USB, WLAN and Bluetooth. The industrial design made of aluminum with optimal heat dissipation ensures reliable operation, even under high load.

In combination with our box PCs, displays offer an interface to the machine that is detached from the actual computing unit. This enables central placement of the box PC and user-friendly positioning of the displays directly by the operator.
