Description

The Series 2 WebPanels with the RK3399 chipset are available in sizes from 10.1" to 21.5" and can be equipped with either a projected capacitive, resistive or non-touch screen. Particularly noteworthy is the particularly narrow display edge, which enables an almost frameless design.

The RK3399 chipset has a quad-core Cortex-A53 with up to 1.4 GHz and dual-core Cortex-A72 with 1.8 GHz. The housings are IP65 rated at the front and have a very compact and robust design thanks to the specially designed aluminum housing. The low installation depth means that the displays can be used almost anywhere.

Products Order no.

WPC005-104NAT04064AAV02P-A 10.4" web panel, without touch, automation browser.
